QGIS is a free and open-source geographic information system (GIS) for desktop computers. It is a powerful tool for working with spatial data. One of the many plugins available for QGIS is the **Vertices Counter**, which allows users to count the number of vertices in a geometry.

1. To install the **Vertices Counter** plugin in QGIS, follow these steps:

2. After installation, the **Vertices Counter** plugin will be available in the QGIS interface. It can be used to count the vertices in a **Vector** layer.

4. Click on the **Count Vertices** button in the **Vertices Counter** dialog box. The results will be displayed in the **Results** section of the dialog box. The **Results** section shows a table with 7 rows of feature IDs and their corresponding vertex counts. The total number of vertices is 155007. Click on the **Export results to CSV** button to export the results to a CSV file.

5. **Vertices** **vertex** **Select** **> X.**
