Note

QGIS is a free and open-source GIS software. It is a powerful tool for spatial data analysis and visualization. It can handle various data formats and provides a wide range of tools for data manipulation and analysis.

- The earthquake point layer would now be loaded and displayed in QGIS. Let's also open the Countries layer. Go to Layer > Add Vector Layer. Browse to the downloaded *ne_10m_admin_0_countries.zip* file and click Open. Select the *ne_10m_admin_0_countries.shp* as the layer in the Select layers to add... dialog.
