The screenshot displays the QGIS 2.0.1-Dufour desktop application. The top menu bar includes 'Project', 'Edit', 'View', 'Layer', 'Settings', 'Plugins', 'Vector', 'Raster', 'Database', 'MMQGIS', 'Processing', and 'Help'. The 'Plugins' menu is currently open, revealing options for 'Manage and Install Plugins...' and 'Python Console'. Below the menu bar is a toolbar with various icons for file operations, navigation, and editing. On the left side, there is a 'Layers' panel with a vertical toolbar containing icons for adding different types of layers (e.g., vector, raster, WMS). The main canvas area is empty. At the bottom, the status bar provides information about the current coordinate (0.515,-1.878), the scale (1:4098808), and the coordinate reference system (EPSG:4326).
