Core plugin QGIS

1. QGIS Plugins > Manage and Install Plugins...
Plugin Manager

2. Open QGIS and go to the **Plugins > Installed** menu. This will open the **Plugin Manager** dialog box. In the **Installed** tab, you will see a list of all the plugins that are installed on your system. The **Spatial Query Plugin** is listed in the **Installed** tab. Click on the **Spatial Query Plugin** to select it. Then click on the **Close** button to close the **Plugin Manager** dialog box.

3. Open the **Spatial Query Plugin** and click on the **Vector** button. This will open the **Vector** dialog box. In the **Vector** dialog box, click on the **Close** button to close the dialog box.

4. plugin Spatial Query Plugin
Vector › Spatial Query

3. Click on the 'Get more' button in the left sidebar. In the main list, click on the plugin named 'QuickQKT'. On the right, click on the 'Install plugin' button.

3. plugin TimeManager plugin Install
