Plugin Manager

Settings

Check for updates on startup

every time QGIS starts

Note: If this function is enabled, QGIS will inform you whenever a new plugin or plugin update is available. Otherwise, fetching repositories will be performed during opening of the Plugin Manager window.

Show also experimental plugins

Note: Experimental plugins are generally unsuitable for production use. These plugins are in early stages of development, and should be considered 'incomplete' or 'proof of concept' tools. QGIS does not recommend installing these plugins unless you intend to use them for testing purposes.

Plugin repositories

Status	Name	URL
connected	QGIS Official Plugin Repository	http://plugins.qgis.org/plugins/plugins.xml?qgis=2.0

Reload repository   Add...   Edit...   Delete
